Business Intelligence Engineer – Data Analytics Engineer

BI Engineer specialized in analytics, cloud data solutions and pipelines. Experienced in defining KPIs, creating dashboards, queries optimization. Committed to turning data into actionable insights for data-driven decisions.

SKILLS

Cloud & Big Data: AWS (Redshift, S3, Glue, Lambda, QuickSight), GCP (BigQuery, Cloud Storage, Dataflow)
Databases: MySQL, PostgreSQL, Oracle, MongoDB, SQL Server
ETL & Data pipelines: Airflow, dbt, Streamsets, Data Modeling
Data Visualization: Tableau, Looker, Amazon QuickSight, Power BI, Spotfire, QlikView
Programming languages: SQL(Tuning, Indexing, Partitioning), Python (Pandas, NumPy, Scikit-learn), R
A/B testing & Analytics: Statistical Analysis, Predictive Analytics, Business Intelligence
Languages: English(professional), French(native)
Interests: Interior design, Running and Climbing

EXPERIENCE

Sogeti (Capgemini) | Data Consultant Paris, France

Client: Renault Group - Data Analytics & Data Product Owner 03/2023 - now

- Define KPIs and develop dashboards across 10+ countries, improving after-sales business service decision-making.
- Led weekly workshops to get and translate business needs for marketing strategies actionable insights.
- Optimized SQL queries (indexing), improving query execution time by 40%.
- Optimized ETL pipelines with data engineers, reducing manual data processing by 50%.
- Conducted dashboard migration to GCP and training sessions for BI & data analytics teams in 10 countries.
- Techs: Oracle, GCP, SQL, Python, Spotfire, Looker, dbt, Airflow, BigQuery, SAFe

Sogeti (Capgemini) | Data Engineer Consultant Paris, France

Client: Groupe SNCF - Data Modeling & Data Analytics 06/2022 - 02/2023

- Created advanced BI dashboards using Power BI, enabling data-driven assets recommendations.
- Optimized data extraction & transformation, improving pipeline efficiency by 30%.
- Defined KPIs and analysed specifications in designing the datalake architecture for seamless migration.
- Techs: Azure, SQL, Python(Panda), Power BI, Excel, Agile

Softeam (Docaposte) | Data Engineer Nantes, France

Client: ENEDIS - Data Engineering, Data Analysis, Business Intelligence 09/2021 - 02/2022

- Enhanced BI dashboards in Tableau, increasing customers satisfaction by 85%.
- Automated R scripts into efficient Python-based ETL pipelines.
- Reduced data processing costs by 40% through optimized ETL transformations.
- Designed a scalable data architecture ensuring real-time insights.
- Techs: Docker, Streamsets, Tableau, MongoDB, Postgresql, Kubernetes, Python, R, Pandas

Dassault Systèmes Rennes, France

UI Components Developer Intern 02/2020 - 07/2020

- Developed and integrated UI components to enhance 3D data visualization, reducing support requests by 98%.
- Detected, communicated and corrected an anomaly in the company customned JavaScript codes.
- Techs: Html/CSS, JavaScript, Sass, Adobe XD, PowerPoint

EDUCATION

University of Technology Belfort-Montbéliard (UTBM) Belfort, France

Master's Degree in Computer Science (Graduation date Feb 2022)

PROJECTS

Amazon sales performance analysis | *Git, Python, Tableau* 03/2025

House Pricing Prediction | *Git, Data mining, Python (Panda, Numpy, SciKit-learn)* 02/2025

CERTIFICATIONS

See my certifications badges on [Credly](#)

IBM Data Science(2025), GCP Professionnal Data Engineer(2024), Specialist Tableau Desktop (2025)
